This documentation is aimed at administrators who have thorough experience with Windows operating systems as well as with connecting databases.

WARNINGS, NOTES AND TIPS

Caution

Cautions help you avoid irreversible problems. Read this information carefully and follow all instructions.

Important

Important notes help you avoid major problems.

Note

Notes provide additional information about a task.

Tip

Tips offer you quicker or easier ways of performing a task.

What can I do with this tool?

- Defining the settings for all HTML text elements in your templates is time consuming and tedious work. This Plug-in allows you to define your settings easily for HTML text elements.
 - For all content classes
 - For one content class folder
 - For one content class
 - For one HTML text element
- Within a few minutes all your HTML text elements have the same settings.

Installation

This documentation describes how to install this Plug-in.

1. Extract the ZIP file.
2. Copy all files into the PlugIns directory on your CMS Management Server with the folder structure from the ZIP file
3. Login into your CMS
4. Switch to Server Manager
5. Expand "Administer Plug-ins" and select "Plug-ins"
6. In the Action Menu click on "Import Plug-in"
7. Follow the dialog and choose the file "plug-in-definition.xml" from the new Plug-in directory and click "Ok"
8. Select the new Plug-in entry and activate it (via Action Menu -> Edit Plug-in)
9. The last step is "Edit Project Assignment" from the Action Menu
